# GARDEN SEEDS.

SPECIALLY SELECTED AND GROWN FOR THE SOUTHERN STATES.

H. G. Hastings & Co.,

REDRIELD BEAUTY

INTERLACHEN, FLORIDA.

GENUINE BERMUDA ONION-Page 7.

## OUR BEST TESTIMONIAL

# Is the rapid increase of our business, not only in Florida, but every other Southern State. : :

UR ORDERS increased during the months of January, February and March, 1893, over four hundred per cent. Such an increase was unexpected, and we were not prepared for it. Our force worked day and night, but it was impossible to keep up with the orders, as they poured in thousands upon thousands. It naturally caused a delay in filling orders, which was no less vexatious to us than to our customers. We have increased our facilities so that we can now handle all orders promptly.

### A NEW FEATURE

### READ BEFORE ORDERING.

We prepay the postage on all Seeds ordered by the packet, ounce, pound, pint or quart. When ordered sent by express or freight, 8 cents per pound, 8 cents per pint, or 15 cents per quart, may be deducted from Catalogue price, except where noted.

All orders are shipped, so far as possible, on the same day as received.

All orders from correspondents must be accompanied with cash. Purchasers will please send sufficient funds to cover the full amount of their order, otherwise seeds only to the amount will be forwarded. Should the remittance be more than sufficient, we will return it.

We will send Seeds by express "Collect on Delivery" when enough money accompanies the order to cover all charges for freight and collection.

Remittances may be made by Draft on New York, money in Registered Letter, Express or Postoffice Money Order, payable at Interlachen, Florida.

Use the enclosed Order Sheet, and read it over carefully before sending, being sure your name, town, county and State address is all right. We received last year more than three hundred orders with either the name or postoffice address omitted.

Keep a copy of your order and verify it on the arrival of your Seeds.

Orders are sometimes stolen or lost; if, therefore, you do not receive your Seeds in a reasonable length of time, notify us, enclosing a duplicate order.

Stamps in ones and twos will be accepted to the amount of fifty cents.

If you only want five cents' worth of seed at a time, don't be afraid to send to us because the order is small. Small orders receive the same careful attention that a larger one does.

### HASTINGS'

# VEGETABLE SEEDS.

Specially Selected and Grown for the Southern States.

We wish to call attention to a few of our Leading Introductions and Specialties suitable for Fall Planting in Florida.

Seeds Postpaid by Mail. Remember that the prices given in this list include the delivery of all seeds by the packet, ounce, pound, pint or quart by mail.

Prices on larger quantities are for freight or express shipment, at purchaser's expense, except where noted.

Liberal Premiums. Please Bear in mind that on seeds in packets only (no ounces, remember) we allow purchasers to select 25 cents worth extra as a premium on each One Dollar's worth.

While we exercise the greatest care to have all seeds pure and reliable, we do not give any warranty, express or implied. If the purchaser does not accept the seeds on these conditions, they must be returned at once.

#### ASPARACUS.

This is a much neglected crop in the South. Anyone having a good muck bed should not neglect the culture of Asparagus.

Palmetto—This is of Southern origin, and is the only variety that has been successful in Florida. Packet 5 cents; ounce 10 cents; ½ pound 25 cents; pound 80 cents.

#### ASPARACUS ROOTS.

While more expensive, the use of the two-year-old roots is by far the quickest. Price of two-year-old Palmetto Asparagus Roots, by mail, postpaid, per 50, \$1.00; per 100, \$1.50; per 1000, not prepaid, \$9.00.

#### BUSH BEANS.

CULTURE-Sow in drills about two inches deep and CULTURE—Sow in drills about two inches deep and four inches apart; drills from eighteen inches to two feet apart. When about to blossom, draw the earth up around the stem. In the South they can be planted from August 15th to November 15th, according to latitude, as well as in the spring.

These prices include the payment of postage on packets, pints and quarts. It sent by express, deduct

15 cents per quart.

#### HASTINGS' EXCELSIOR REFUCEE.

The best green podded Bean for the trucker or for home use. This bean is the same as the Improved Round Pod Refugee, except that it is two weeks earlier. During the past three years it has almost entirely taken the place of the Round Pod Refugee. A strong grower and very prolific bearer. Excellent quality. The pods are well rounded out, and stand shipment much better than the Valentine. Packet to quanty. The pous are well rounded out, and stand shipment much better than the Valentine. Packet 10 cents; ½ pint 15 cents; pint 25 cents; quart 40 cents; peck \$1.25; bushel \$4.75. Extra Early Red Valentine—Same as the Improved

Extra Early Red Valentine—Same as the Improved Red Valentine, except ten days earlier. Pods thick and fleshy, and of fine quality. Is uniform in ripening, and is considered one of the most profitable for the market gardener. Packet 10 cents; ½ pint 15 cents; pint 25 cents; quart 35 cents; ¼ bushel \$1.25; bushel, \$4.25.

New Union White Valentine—Perhaps no greater improvement in dwarf beans has ever been accomplished than in this variety. It originated in Jefferson county, N. Y., with one of our largest bean grow-

ers, and, as its name implies, is a complete union of all good qualities necessary to make a dwarf greenpod bean perfect. It is much earlier and of a dwarfer habit than the old White Valentine, the pods being rounder, smoother, plumper and more meaty, and entirely stringless. Among many others it possesses the peculiar and valuable quality of remaining in a tender cooking condition longer than any other green-podded variety. This, together with its EXTREME EARLINESS—being fit to pick in forty days from time of germination—makes it an exceedingly valuable sort for spring or fall planting. The beans, when ripe, are pure white, thus enabling the grower to sell them as shelled beans at a profitable figure in case he cannot sell them in the green state. Packet to cents; pint 25 cents; quart 45 cents; peck \$1.50; bushel \$5.50. all good qualities necessary to make a dwarf greenbushel \$5.50.

#### HASTINGS' EXCELSIOR REFUGEE.

New Refugee Wax—This new variety is one of the earliest beans grown. It is a perfect Refugee with long, round golden yellow pods. Is suitable for early or late sowing for either wet or dry seasons. An immense yielder. Packet 10 cents; ½ pint 20 cents; pint 30 cents; quart 50 cents; peck \$1.75; bushel \$6.50.

NEW GOLDEN EYED WAX BEAN.

New Golden Eyed Wax—We recommend this new strain most highly. A vigorous grower and heavy bearer of clear golden yellow pods of good quality. It is a great improvement on the Improved Golden Wax, both for home use and shipping, being remarkably free from rust. Is slightly earlier than either Wardwell's Kidney or Golden Wax. Try it. Packet 10 cents; ½ pint 15 cents; pint 25 cents; quart 45 cents; peck \$1.50; bushel, \$5.50.

#### BEETS.

Our prices include the payment of postage on all seeds by packet, ounce, pound, pint or quart.

CULTURE—Sow in rich or well-manured ground after spading or plowing well. Sow in drills; thin out to six inches. Sow from September first to May first.

Hastings' Crimson King—When we offered this beet last season we especially recommended it for market gardeners on account of its extreme earliness, it having proved the earliest beet in cultivation, being ready for use in six weeks from time of sowing. We find by further tests that it is of fully as good quality as Eclipse, and makes it valuable for the home garden as well. No one should be without this variety. Packet 10 cents; ounce 15 cents; ½ pound 35 cents; pound \$1.00.

Hastings' Improved Blood Turnip Beet—An improvement by our grower of the Early Blood Turnip Beet; color a deep blood red; fine form and flavor. Earlier, more uniform in size and of better quality than the old strain. All who garden for market should try this new strain. Packet 5 cents; ounce 10 cents; ½ pound 25 cents; pound 75 cents; ten pounds \$6.00.

Lentz's Extra Early Blood Turnip—We recommend it as containing all the valuable essentials of an early beet. It is nearly as early

#### CRIMSON KING BEET.

as the Egyptian, but larger and of better quality. Of fine, dark red color; tender and sweet at all times, whether old or young It has very small top and will

pro uce a crop in six weeks from time of planting the seed. It is very productive and a perfect keeper. Packet 5 cents; ounce 10 cents; ½ pound 20 cents; pound 60 cents; ten pounds, not prepaid, \$5.00.

Eclipse—Rapid grower, small top and extra fine quality; roots perfectly smooth and round, blood red skin and flesh, fine grained and sweet. Its small top and extremely

small top and extremely Lentz's Early Turnip Beet. heavy cropping qualities recommend it to gardeners and truckers. Pkt. 5c.; oz. 10c.; ½ lb. 20c.; lb. 55c. ten lbs., not prepaid, \$4.25.

#### CAULIFLOWER.

Hastings' Cauliflower Seed is from the most reliable growers in the United States and Europe. We furnish the grower the highest grade of Seed and we do not charge from 50 cents to \$1.00 per ounce extra for Red. Yellow or Blue Seals.

CULTURE—Does best in a rich, well-tilled soil; will do in a well-manured, sandy soil. Sow in seed bed in September, October and November. Transplant when three to four inches high. Give plenty of water n dry weather. Keep wet and hoe thoroughly and often. Heads may be blanched extra white by tying the leaves over the top closely. Should be more generally cultivated in the South than it now is.

Thorburn's Gilt Edge—Introduced by us to the Southern growers last year. This has been thoroughly tested by thousands of our customers the past year, and not a single complaint have we had. It is the largest, most perfect and surest header of any variety ever offered, and in quality it is unexcelled. One specimen sent to our store weighed 7 pounds and 8 ounces, without the leaves. It is of the Snowball type, but is much larger and will stand longer without decay than any other. Packet 25 cents; ½ ounce \$1.00; ½ ounce \$1.75; ounce \$3.00; ¼ pound \$10.00; pound \$3.800.

George Riggin, Manatee County, Fla, says: "Your Gilt Edge Cauliflower is the finest I have ever seen."

THORBURN'S GILT EDGE CAULIFLOWER.

# Hastings' Gabbage Seed.

#### OUR SELECT STRAINS FOR THE SOUTHERN STATES.

We have realized the necessity that the gardener and trucker must have only true and pure Cabbage Seed. This is our specialty in seeds. Our growers have exercised unusual care in the growing of our Cabbage Seed. Our Cabbage Seed is equaled by none, all of our seed being grown from carefully selected heads. The demand is for the best seed. We can supply that demand, and all we ask is a trial order.

### HASTINGS' "BIG 4" CABBAGE COLLECTION

Has become so popular with our customers that we again offer it.

THE "BIG 4" We call the following mentioned varieties of cabbage our "Big 4." To further introduce these into every garden in the Southern States, we will send one full-sized packet of Sure Crop, Long Island Wakefield, Centennial Flat Dutch, and Florida Drumhead for 25 cents, postpaid, and will also add as a premium one packet of the new Breadstone Turnip. We want every garden in the South to contain our "Big 4." At full list price these seeds would cost you 45 cents.

Hastings' Florida Drumhead—For three years we have endeavored to find a Drumhead Cabbage combining all the desirable features of the Drumhead class, and yet have heat-resisting qualities. Our Florida Drumhead embodies all these qualities. It is a short-stemmed strain and grows very compactly, the leaves all turning in to make the head, thus making it possible to plant closer together than most varieties. Heads are large and very solid, round and flattened on tep. They are a strong grower and a

sure header, and will stand more heat than any other variety. Weighs from 15 to 25 pounds. Packet 10 cents; ½ ounce 15 cents; ounce 25 cents; ¼ pound 85 cents; pound \$3.00.

HASTINGS' FLORIDA DRUMHEAD.

HASTINGS' SURE CROP CABBAGE.

Hastings' Long Island Wakefield (SELECT STRAIN) - Introduced the same season as Sure Crop, and is taking the lead of all pointed and oval cabbages, just as Sure Crop leads all flat varieties. This is a cross between the Selected Early Jersey Wakefield and Early Dwarf Flat Dutch, giving increased size with the same earliness. Of all the Wakefields ever offered, this is the most valuable, either for shipment or home use. If you are growing pointed cabbages you cannot afford to grow any variety other than this. No pointed cabbage has ever met with such favor before. So popular has it become that the principal seedsmen of the North have put on the market the past two years inferior strains under the name of "Charleston Wakefield," "Large Early Wakefield," etc., hoping to detract from the growing popularity of our Long Island Wakefield. We invite comparison. Not one word of complaint have we had from it while hundreds have expressed their satisfaction Ready for use in fifty days from transplanting. Large packet 10 cents; 1/2 ounce 20 cents; ounce 30 cents; 1/4 pound \$1.00; pound \$3.50.

Hastings' Sure Crop or Shippers' Prize—Introduced by us in 1889, and at once took the lead as the shipping cabbage for the Southern States. This is our prize

HASTINGS' LONG ISLAND WAKEFIELD CABBAGE.

cabbage, and is without a rival. The experience of all truckers and market gardeners who have tested it goes to corroborate our statement that it is the best and most profitable variety ever offered in the South. It is the earliest and surest large, flat, round cabbage on record, and its quality is excellent, being tender,

#### HASTINGS' CENTENNIAL FLAT DUTCH,

crisp and solid. Where it is rightly cared for, scarcely a seed will fail to form a head. In an experiment it produced heads ready for market in forty days from the time of transplanting. Heads average eight to nine pounds in weight. Large packet 10 cents; ½ ounce 20 cents; ounce 30 cents; ½ pound \$1.00; pound \$3.50.

Hastings' Centennial Flat Dutch—This large strain of the Flat Dutch is the only cabbage that has resisted the repeated and heavy frosts in the northern part of Florida the past season. It is a comparatively late variety. During all the cold weather of the season of 1800-91, it grew vigorously, scarcely a leaf wilting. This is the variety to plant on any lands subject to severe frosts. Grows from twelve to twenty pounds, according to soil and culture, and is a good reliable header. We control the stock of this variety, and it can be obtained of us only. Packet locents; ½ ounce 15cents; ounce 25cents; ¼ pound 85cents; pound \$3.00.

GENUINE SUREHEAD CABBAGE.

Genuine Surehead—This popular Cabbage is rightly named Surehead, and never fails to make a remarkably fine, solid, large head, with few outer leaves, as shown in our illustration. It originated some years since with a practical market gardener, by crossing the Flat Dutch and Drumhead varieties, and has always brought the highest price in market. It is a strong, vigorous grower, ripening late for a main crop, and very uniform in size and color. Our supply is grown from the original seed; none better to be had at any price. Packet 5 cents; ounce 25 cents; ½ pound 75 cents; pound \$2.50.

Henderson's Succession—A large, flat cabbage, introduced in 1888. About ten days later than Early Summer, but is nearly double the size. A good strain and a reliable header, but not as compact in growth of head as Sure Crop. Our seed is grown from original stock. Packet 5 cents; ½ ounce 15 cents; ounce 25 cents; ¼ pound 75 cents; pound \$2.50.

EMERALD KING.

Hastings' Emerald King-During the fall of 1891 we distributed several hundred packets of this variety without having tested it ourselves. We were surprised at the exceedingly favorable reports received from it. Having but a small amount of seed we offered it in packets only under the name of No. 300. We again have but a limited quantity of seed to offer, but we would advise every cabbage grower in the South to try this superb variety this year. It has been thoroughly tested, and we can recommend it fully. It is an early, flat cabbage that can be grown either for early or late crop. It is of good size, heads averaging from seven to eight pounds; grows very uniformly; is a sure header, and does not burn or blister in the dryest and hottest weather. It is a splendid variety to withstand droughts. It is of a dark, glossy green color, and is pre-eminently a shipping cabbage for the Southern trucker, holding its color and fresh appearance long after other standard varieties wilt. Packet 10 cents; 1/2 ounce 20 cents; ounce 35 cents; 1/4 pound \$1.00; pound \$3.50.

Early Deep-head—The heads of this cabbage grow to a large size, and, as its name signifies, are deeper through than ordinary stocks of second early cabbages. It heads up firm, and we find it a valuable variety for the Southern shipper. Packet 5 cents; ounce 25 cents; ½ pound 75 cents; pound \$2.50.

All-Head Early—Introduced in 1891. It is very early, of good size and quality, and a sure header. It is well named "All-Head," as it is almost free from loose leaves. It is a week earlier than Henderson's Early Summer, and a better shipper. Packet 5 cents; ounce 25 cents; ¼ pound 75 cents; pound \$2.50.

The Hastings White Spine-The finest early strain of White Spine ever grown. We have in this new strain of White Spine a cucumber that eclipses all others for shipping purposes. The steady increase in the sale of the Emerald Green White Spine shows how readily the planter takes hold of any real improvement. The Hasting White Spine is by far the best of all White Spine strains, as can easily be seen when grown side by side. The fruit is of large size and is immensely productive. This produces no small or imperfect cucumbers. The skin is hard and of a deep green color, which it holds until fully matured. Is crisp and tender, and retains its fresh, plump appearance long after being gathered. It is nearly one week earlier than any other White Spine variety. It is equally valuable for home use. Large trial packet 10 cents; ounce 15 cents; 1/4 pound 30 cents; pound \$1.00; ten pounds, not prepaid, \$8.00.

#### CELERY.

CULTURE—The seed bed may be in any moist place. Cover the seed lightly in the bed in May, June, August and September. Transplant when six inches

high. Dig a trench a foot deep and put in four or five inches of well-rotted manure; cover that with good soil or a light, sandy loam, well mixed with muck or leaf mold; transplant the plants from the seed bed into rows three feet apart—plants six inches apart in the rows. At the end of five or six weeks begin drawing the soil up to the leaves, packing it firmly. Keep it well banked up if you want tender, well-bleached celery. Water freely with soap-suds, liquid manure or water, being careful not to pour in on the plants.

There are but two varieties that have proved a success for general planting in the South: Mexican Solid and Savannah Market. In certain localities Boston Market, Crawtord's Half Dwarf and Golden Self-Blanching have done well, but we do not advise a general planting except of Mexican Solid and Savannah Market.

Mexican Solid—Stocks rounded, crisp and solid; growth large. A most reliable strain. No celery can compare with its ability to withstand heat. When ready for market the plants are plump and do not wilt as soon as most sorts. Its flavor is tully equal to that of celery grown in the Kalamazoo (Mich.) celery district, having the rich nutty flavor so desirable in celery. Packet 10 cents; ounce 30 cents; ¼ pound \$1.00; pound \$3.00.

Savannah Market—Introduced by us in 1889. While not as highly flavored as the Mexican Solid, it is better adapted for growth on poor and light soils, being a much stronger grower. Packet 10 cents; ounce 30 cents; ½ pound \$1.00; pound \$3.00.

The Pure Stock of Mexican Solid and Savannah Market Celery can be obtained of us only.

#### LETTUCE.

CULTURE—May be sown during the whole year, but takes considerable trouble to grow it during the hot months. The richer and better the ground, the larger the heads will be. In Florida, sow broadcast and transplant when large enough to ten inches apart in

MEXICAN SOLID CELERY.

the row and rows a foot apart. It requires a rich, moist soil, clean cultivation and plenty of water. This will give quick growth, on which its appearance, flavor and tenderness depend.

Lettuce for northern shipment should be sown during November and December.

Hastings' Drumhead White Cabbage—A favorite with our customers. Large, solid heads weighing two or three pounds. Leaves outside are dark green, inside almost white. Crisp and tender and always entirely free from bitterness. Has but little tendency to run to seed. The best variety to grow for shipping

or for home market in every respect. Packet 5 cents; ounce 25 cents;  $\frac{1}{4}$  pound 65 cents;  $\frac{1}{2}$  pound \$1.75.

Florida Header Lettuce (No. 152)—This superb variety was distributed by us last season to nearly three thousand Southern growers. It is a large white heading variety that we believe superior to the Drumhead Cabbage Lettuce. For the lettuce shipper we believe it to be unsurpassed. It is extremely hardy, very quick in growth, but slow to run to seed. Packet 10 čents; ounce 35 cents; ½ pound 90 cents; pound \$3.00.

Hastings' Drumhead White Cabbage Lettuce.

Florida Header Lettuce.

# Hastings' Genuine Bermuda Onion Seed.

CHEAP ONION SEED IS DEAR AT ANY PRICE.

VERY IMPORTANT TO ONION GROWERS: The Bermuda Onion is one of the most important of Southern vegetable crops, and there is no crop that depends more on the quality and genuineness of the seed. An ever-increasing demand for the true Bermuda seed has led to wholesale fraud in the sale of it by certain reputable (!, New York and Philadelphia seedsmen, who offer it somewhat as follows: "Bermuda Onion Seed. We again have pleasure in offering new crop seed of the true Bermuda Onion, the seed of which is often difficult to obtain," then

offering it at \$2,25 and \$2,50 per pound. The genuine cannot be sold at that price. The seed offered is either Italian or California grown, and can be bought in the wholesale seed markets at 90 cents per pound.

It is a well known fact to those in the seed business that it is next to impossible to retain the vitality of onion seed over one year. Heretotore any purchaser could get fresh (?) onion seed of any seedsman at any time of year. In view of the almost certain failure of onion seed one year old, 'we do positively refuse to sell any onion seed between August 1st and October 1st. Our new crop seed will be ready about October 1st, and we can then give you good, fresh onion seed, that will germinate well and uake good onions. We make this refusal in the interests of the planter as well as for

our own reputation. We are bound to send out seeds of strong vitality only. If you want to make a general order for seeds before October 1st, you may order the onion seed. We will then hold the order for onion seed and send when the new crop is ready. It will pay you to wait for the new crop before planting.

CULTURE—Sow the seed in seed beds from the first of October to the first of December in Florida. Cover the seed to the depth of one-half inch and firm the soil over it. Keep the soil moist. If convenient, shade the bed lightly. When well up this is not necessary. When they are the size of a goose quill they should be transplanted into rich or heavily fertilized soil in rows eighteen inches apart, five inches apart in the row You can't grow good, large onions without heavy fertilizing. Work them thoroughly and often. In a moist soil seed can be sown in drills where they are to stay and then thinned out. If you want a good onion crop and have not tried our seed, do so. They will prove satisfactory. The Bermuda White and Red are the only sure varieties for Florida.

Bermuda White—Packet 5 cents;  $\frac{1}{2}$  ounce 15 cents; ounce 25 cents;  $\frac{1}{4}$  pound 85 cents;  $\frac{1}{2}$  pound \$1.60; pound \$3.00.

Bermuda Pale Red—Packet 5 cents; ½ ounce 15 cents; ounce 25 cents; ¼ pound 85 cents; ½ pound \$1.60; pound \$3.00.

#### IMPORTED ONION SEED ONLY.

It is a well-established fact that the northern or American grown onion seed will not produce bulbs in the South. We offer for sale only genuine imported seed of all varieties of onions catalogued by us. American grown seed is offered by northern seedsmen at a lower price, but they will not produce the bulbs IF YOU WANT GOOD RESULTS, USE HASTINGS' SEEDS.

#### ONION SETS.

The cheapest and best way to raise onions is from good seed. There are many, however, who prefer the sets.

Bermuda Red Sets 'Florida grown)—We can only offer the Bermuda Red Sets this year, grown from our genuine seed near Interlachen. If planted in September they form large fully-matured bulbs by January. We only have 100 bushels this year, but will supply them as long as they last at 20 cents per pint; 35 cents per quart, postpaid; peck \$1.50; bushel \$5.50, not prepaid.

WHITE MONTPELIER ONION SETS.

White Montpelier Onion Sets (Green Onions for First Early Bunching)—They are of a pure silvery white color, enormously productive, frequently producing as many as twenty bulbs in a single cluster, from a single bulb planted; excellent quality and size for bunching green, or can be ripened for use as pickling onions, and for this latter purpose can be

grown much more economically than from seed. Their keeping qualities are remarkable, having kept perfectly sound for a year, but their most important quality is extreme earliness, being ready for market from three to four weeks ahead of other onion sets. Our grower says: "They cannot be beaten for earliness; they are matured before the weeds and grass can cover them"

The largest of the sets allowed to grow through summer make an onion of fair size, which divides when ripening in the fall, multiplying liberally for another season. Our illustration is made accurately from nature. Stock very limited. Pint 25 cents; quart 45 cents; ½ bushel \$2.00, not prepaid.

#### PEAS.

### PRICES INCLUDE POSTAGE PREPAID BY PINTS AND QUARTS.

Our stock of peas has been carefully grown and will be found to be just as represented.

Culture—For early peas a moderately rich and dry loam is the best; for the later sorts a heavier soil is preferable. Fresh stable manure is apt to make a heavy growth of vines, hence the ground for the early crop ought to have been manured the previous autumn. If this has not been done, then apply well-rotted manure at the time of sowing. Sow in drills about two or three inches deep. Let there be two rows, ten inches apart, three to four feet between the rows. If for home use sow the peas (in Florida) from four to six inches deep. It will take them longer to mature, but you will get double the usual crop in this way.

Bliss' Everbearing—Height of vine eighteen inches to two feet. Pod three to four inches long, each pod containing six to eight wrinkled peas. Size of peas very large, frequently half an inch in diameter; quality very fine. Its habit of growth is of a peculiar branching character, forming as many as ten stalks from a single root stalk. The individual branches are of extraerdinary strength and substance, so that when hilled up properly they stand up well without brushing. For continuance of bearing this variety is notable—a characteristic which gives it especial value for late summer and autumn use. After repeated

pickings the vines continue to be covered with blossoms and buds, developing to maturity in turn. The quality is the best of any pea known. A variety that should be in every garden. Packet 10 cents; ½ pint 15 cents; pint 25 cents; quart 45 cents; peck \$1.25; bushel \$4.50.

John L.—This is the earliest pea ever offered. It matures earlier than any extra earlier variety, such as First of All, Morning Star, Daniel O'Rowrke, etc. Can be planted any month except July and August. Is very hardy and the best for the trucker, being the most prolific of any early variety. This has become very popular in the South; last season our sales of John L. were more than our sales of all other varieties combined. One of our Orange Co., Fla.,

customers wrote us that from ½ bushel of John L. planted by him he got 18½ bushels of green peas at the first picking. We have a large supply now, and can offer it at a reduced price. Packet 10 cents; ½ pint 15 cents; pint 25 cents; quart 40 cents; peck \$1.25; bushel \$4.00; two bushels \$8.00.

Hastings' Home Delight—The original strain of this heavy bearer was introduced by us in 1889. Since that time it has been improved by selection until it is now the best and earliest bearer of all the heavy croppers. For home use and near by market it is invaluable. A strong grower, withstanding the effects of frost better than any other. The heaviest bearer we know of, and yet of such dwarf growth as to not require bush or staking, if planted in double rows eight inches apart. Packet 10 cents; ½ pint 15 cents; pint 25 cents; quart 45 cents; peck \$1.40; bushel \$5.00.

Southern Queen—Introduced by us last year. The most valuable introduction since Bliss' Everbearing Pea was placed on the market. The illustration shows the natural average size of the pods. Is a strong, sturdy grower, two feet high, branching sim-

JOHN L.

ilar to the Bliss Everbearing. In quality and productiveness it is fully equal to that famous variety, and has the valuable quality of bearing at the least one month longer, making it a continuous bearer for three and one-half months. This variety should be in every garden. Packet 10 cents; ½ pint 20 cents; pint 30 cents; quart 50 cents; peck \$2.00.

#### HASTINGS' RADISH SEED.

#### REMEMBER OUR PRICES INCLUDE POSTAGE.

CULTURE—Sow in any good garden soil any month in the year. In summer, water frequently to induce a quick growth.

New Glass Radish—We distributed this new radish to a number of careful growers last season as No. 10. This is a sample of the reports:

"Your No. 10 Radish is the best radish that I have ever grown.

DUDLEY W. ADAMS,

"Tangerine, Fla."

It is a long radish, of light pink color, white tipped and of a uniform size. Flesh is transparent white, always crisp and brittle, even if grown to a large

SOUTHERN QUEEN PEA.

NEW GLASS RADISH.

size, and is mild flavored. It was named Glass Radish on account of the transparency of the flesh. Gardeners will find it to their interest to plant this variety. Packet 10 cents; ounce 15 cents; 1/4 pound 45 cents; pound \$1.25.

Hastings' Mixed Radishes—For those who desire a mixed collection we have put up a large quantity of our mixture of fifteen varieties suitable for southern growth. Large packet 10 cents; ounce 15 cents; ½ pound 35 cents; pound \$1.00.

It is well known to market gardeners and truckers that French radish seed is far superior to the California and English grown seed. Our radish seed is from the famous Maine-Et-Loire district of France. It is higher in price than the American grown, but the crop is what shows its value.

#### TURNIPS.

Burpee's Bread-Stone—A valuable variety for the South, and we give it a place at the head of our list. Of medium size, quick growing, smooth roots, white, with a light green top. Flesh perfectly white, fine grained, and cooks in fifteen minutes. Very tender and sweet. Has many of the characteristics of the Ruta-Baga in growth, especially the large top, which can be used for greens. Is the best turnip for fall and winter in the South. Packet 5 cents; ounce 10 cents; ½ pound 25 cents; pound 75 cents.

### Remember!

Hastings' seeds are specially selected and grown for the Southern States. We are the only seed firm in the United States that have seeds grown specially for use in the South. We have imitators. Beware of them. Our select strains can be obtained of us only.

# GENUINE

### FLORIDA GROWN RYE RED RUST PROOF OATS

PRICES
ON APPLICATION.

OUR ANNUAL CATALOGUE will be sent out early in December. It will contain full descriptions of all varieties of vegetable, farm and field seeds sold by us; of grass and forage plants valuable for the South, and a select list of flower seeds. This will be sent to every purchaser from this catalogue or to any who will apply.

### GENERAL LIST OF

# VEGETABLE SEEDS.

Specially Selected and Grown for the Southern States.

Seeds Sent Postpaid by Mail.—Remember that the prices given in this list include the delivery of seeds by the packet, ounce, quarter pound, pound, pint or quart. Send us the amount named in this catalogue and we guarantee safe delivery by mail.

## A PRIZE-WINNING TOMATO.

REDFIELD BEAUTY TOMATO.

REDFIELD BEAUTY.—For five years this splendid variety has been grown by thousands of our customers in all the Southern States. In every way it has proven superior to any tomato ever offered in the South. Its vigorous growth, heavy and long-bearing qualities, its hardiness, its perfect-shaped fruit and freedom from rotunder the most trying circumstances of growth has made it a favorite wherever planted. While it is so well known, we again give the abridged description of last year's Catalogue: "Of glossy, crimson color, with a slight tinge of purple. Skin thick and tough. Grows in clusters of tour or five fruits. Retains its large size till all are picked. Its shape is almost perfect, and it cannot be excelled for toughness of skin and solidity. For shipping and early market it can be picked green, and it will ripen up nicely, presenting a handsome appearance. The best in every respect for shipping or for home use." Price, large packet, to cents; one-half ounce, 15 cents; one-fourth pound, 83 cents; pound, 83.00.

#### WHAT OUR CUSTOMERS SAY.

"It gives me pleasure to state that I took first prize at the South Florida Fair with your Redfield Beauty Tomato," Chas. E. Smith, Windermere, Florida,

J. W. Johnston, Manatee County, Florida, writes: 'For three years have bought your Redfield Beauty

Tomato for winter growing, and have produced fruit that no State in the Union need be ashamed of. We sold to the Tampa Bay Hotel a large quantity of them, and they thought enough of them to put them on view, with a card saying where they were grown. They were much admired by the guests."

## Plant Protectors. \*\* Plant Protectors.

#### SOMETHING NEW. SOMETHING DURABLE.

By using this new invention for the protection of tender plants from frost, you can gain fully one month n getting tomatoes, squash, egg plant, cucumbers and melons to market. If you are a trucker you cannot afford to be without it. If you are a home gardener you can have vegetables a month earlier. Send for special circular, giving description and prices.

A Monthly Agricultural Paper, Published at Interlachen, Florida.

### You Want It. \* Your Wife Wants It. \* Your Children Want It.

And if you have friends in the North whom you want to get to Florida, send a copy to them.

### IT CONTAINS

Information for the Home Gardener;
Information for the Market Cardener;
Information for the Fruit Crower;
Information for the Strawberry Crower;
Information for the Poultry Raiser;
Information for the Ceneral Farmer;
Information for every one engaged in Farming and Fruit Crowing in the South.

#### THE CHEAPEST AGRICULTURAL PAPER IN THE SOUTH.

It is a cheap medium of information to the agricultural and horticultural residents of the South of desirable methods of cultivation of vegetables for market or for home use; of general crops; of hay and forage crops; of permanent improvement of the soil; how to fertilize at the lowest possible cost, and the best fertilizers for the different crops.

#### CONTRIBUTORS.

Among our contributors are Dudley W. Adams, President of the Florida Horticultural Society, Ed. Rumley, George W. Hastings and H. G. Hastings, the well-known writers on farm and gardening topics, and "Uncle Snort," the associate editor of Texas Farm and Ranch.

#### OF SPECIAL VALUE

To the gardener, either for market or for home use, is the series of articles by H. G. Hastings, which appear in each issue, taking up in detail the cultivation of each variety of vegetables.

#### SUBSCRIPTIONS.

All subscriptions should be sent to Geo. W. Hastings & Co., Interlachen, Florida, or to save extra expense in remittances, you may include the subscription for the Ruralist in your remittance for seeds.

#### ONLY 25 CENTS A YEAR.

It costs twenty-five cents per year, or five subscriptions for one dollar. Get four of your neighbors to subscribe with you and you will get your own free. Sample copies free on application to
